PROFESSIONAL EXPERIENCE

Business Analyst

Jan 2026 - Current

Citizens Financial Group | NJ

- Built multi-scenario Excel models with sensitivity and stress-test analysis to value positions across \$500M+ in assets under management, giving management a clear read on downside exposure before committing capital.
- Designed Power BI dashboards tracking financial performance, risk, and cost-of-capital metrics against internal thresholds, replacing manual reporting and giving leadership near real-time visibility into where results were drifting.
- Queried Snowflake in SQL to extract, validate, and reconcile transactional data feeding month-end P&L reporting and external audit requests, cutting manual effort 35% and shortening the close cycle.
- Partnered with front-office traders, Treasury stakeholders, and risk officers to map the order-to-settlement process end to end, pinpointing the breakdowns behind a 28% reduction in operational reconciliation breaks.
- Translated Basel III LCR/NSFR and CCAR/DFAST requirements into reporting specifications for a Treasury liquidity platform and led UAT across 160+ scripts, launching the module with zero Severity-1 defects.

Operations Analyst

June 2024 – Mar 2025

Pesapal | Kenya

- Gathered and documented business requirements for a Treasury Management System upgrade, developing BRDs, FRDs, use cases, and functional specifications while coordinating requirements across treasury operations, IT, and third-party vendors
- Conducted stakeholder analysis and root-cause analysis of settlement failures and reconciliation breaks using Bloomberg Terminal data and OMS records, resolving \$8M+ in exceptions and improving data accuracy
- Documented current-state and future-state processes using BPMN and Lucidchart, identifying workflow gaps and automation opportunities that reduced invoice processing time by 25% and eliminated 300+ manual touchpoints monthly
- Developed SOPs and process documentation for KYC/AML onboarding controls, contributing to a 40% reduction in audit-identified deficiencies while demonstrating strong attention to detail and regulatory awareness
- Created Tableau dashboards to monitor SLA adherence, trade error rates, and cost-per-transaction metrics, while supporting Agile sprint planning through JIRA user stories and acceptance criteria, contributing to an 18% reduction in post-release defects

Finance Associate Intern Analyst

Oct 2023 - May 2024

I&M Bank | Kenya

- Analyzed financial data and generated management reports using advanced Excel techniques to support financial analysis and reporting.
- Managed budgeting and expense reconciliation activities, reviewing financial records to identify discrepancies and improve reporting accuracy.
- Prepared and reviewed daily financial documents, maintaining accurate records and supporting timely completion of finance and reporting processes.
- Conducted compliance and documentation checks in line with internal policies and regulatory requirements, demonstrating strong attention to detail and accuracy.
- Gained exposure to treasury and money market operations while collaborating with finance teams to support transaction processes and day-to-day financial activities.
